## **GOD'S ENERGY & AQUACULTURE HOLLISTER LLC**

### **Announces First Renewable Energy Powered Vertical Fish Farm**

**a Joint Venture Thursday, March 5, 2015**

*12- Stories Tall – 2 MW Power*

*Houston, TX— a Joint Venture Thursday, March 5, 2015* — Today GOD'S ENERGY & AQUACULTURE HOLLISTER LLC announced signing of a Joint Venture Thursday, March 5, 2015, with owners of a 20-acre commercial development to build the world's first Vertical Fish Farm to deliver 2 MW of clean renewable energy (12,264 megawatt-hours of electricity), 1,000 tons of organic produce, and 1,500 tons of fresh salmon annually.

Partners with more than 20 years experience in the Houston commercial real estate development of industrial and commercial properties will oversee the project management for the real estate. Partners with over 20 years of experience in Aquaculture (the business of raising fish often combined with hydroponic farming) who have developed successful commercial projects in more than 10 countries around the world will manage all aspects of the aquaculture development including the complete business plan.

Genergy, LLC will build a land-based 2 MW power plant to serve the heating, cooling, and pumping needs of the facility and sell the excess energy to tenants onsite at a deep discount from their current electricity bills. *More details to follow...*
